

# Automate Crew Scheduling

Bulk manage and plan the deployment of your workforce.

## OCS HR Planning & Rotation Module

OCS HR Planning & Rotation module is an essential tool for crew coordinators as well as rotation schedule planners. The comprehensive feature gives all system managers full control and oversight of the scheduled location of the workforce. The module automates the crew management process, reduces time spent on registering activities and planning manning on vessels.

The newly released scenario functionality supports the crew coordinators in developing potential future scenarios for crewing planning prior to implementation. This ensures the delivery of the most time and cost-efficient scheduling.

## Benefits:

### Save time

Bulk register the workforce.

### Accelerate deployment

Identify the most efficient crew rotation schedules.

### Reduce cost

Oversee all activities from a single interface.

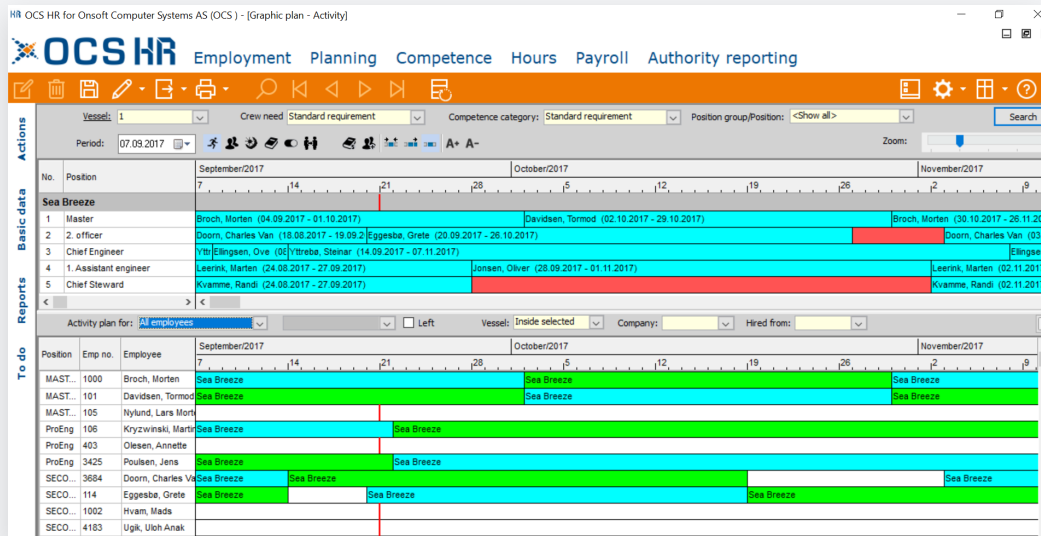

### Futureproof

Ensure all vessels are adequately manned.

## Features:

- ✓ Complete view of all employee activities including annual leave, competencies, illness and sailing dates.
- ✓ Sailing plan adheres to predefined rotation patterns.
- ✓ Drag and drop function for planning and adjusting sailing periods.
- ✓ Schedules can be viewed by geographical location, single crew, vessel or by any other criteria.
- ✓ The quality control functionality ensures that all vessels are correctly manned.
- ✓ Schedules can be planned in advance and implemented with short notice.

## OCS HR Planning & Rotation module - examples of views

The above example lists planned activities at the top and available personnel at the bottom. Team members can be 'dragged and dropped' to the activities to ensure compliance.
